

YOUR CITY ALREADY HAS THE EYES.

IT JUST CAN'T UNDERSTAND
WHAT THEY SEE.

CAMERAS
RECORD.

PEOPLE
INTERPRET.

CRITICAL MOMENTS
CAN GET LOST.

LAMINAR

THE INTELLIGENCE LAYER FOR THE PHYSICAL WORLD

The problem isn't cameras. It's understanding at scale.

1. MASSIVE VISUAL INPUT THOUSANDS OF CAMERA FEEDS

-  Hundreds to thousands of cameras
-  24x7 continuous video streams
-  TBs of data every single day

2. HUMAN BOTTLENECK ATTENTION IS LIMITED

MONITOR

Operators watch multiple feeds simultaneously

VERIFY

Potential events need manual verification

CONTEXTUALIZE

Understand the situation and its severity

CORRELATE

Check other cameras, time, location and patterns

DECIDE

Choose the right response and escalate

Too many steps.
Too much time.

3. CONSEQUENCES WHAT GETS LOST IN THE GAP

DELAYED RESPONSE

Every minute of delay increases risk and impact

MISSED OR LATE DETECTION

Subtle or fast-moving events go unnoticed

FRAGMENTED VIEW

Events are seen in isolation, not as a complete picture

HIGH OPERATOR LOAD

Fatigue leads to errors and missed events

POOR ACCOUNTABILITY

Hard to reconstruct what happened, when and why

THE RESULT

Slower Decisions
and Responses

Higher Risk
to People & Assets

Operational & Financial
Losses

Lower Public Trust
and Confidence

The data is already there.
The intelligence layer is missing.

Organizations don't need more cameras. | They need intelligence that can understand, prioritize and act in real time.

One Platform. From Cameras to Decisions.

Laminar | converts real-time visual data into contextual intelligence and drives the **right action** at the right time.

Works with what you already have
No new hardware required

Lower Cost
Leverage existing infrastructure

Quick Deployment
Modular, scalable & future ready

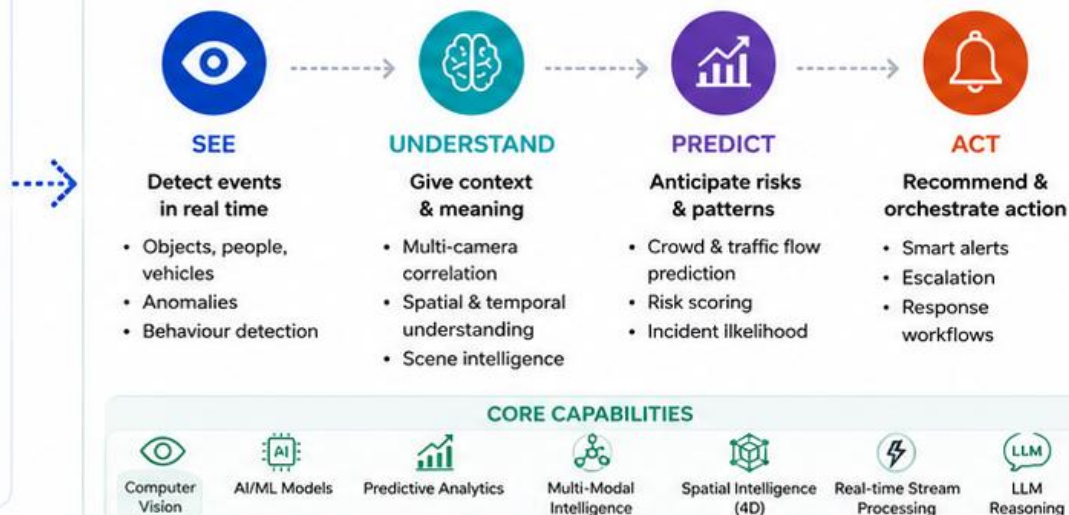

Measurable Impact
Faster response, better outcomes

1. EXISTING INFRASTRUCTURE

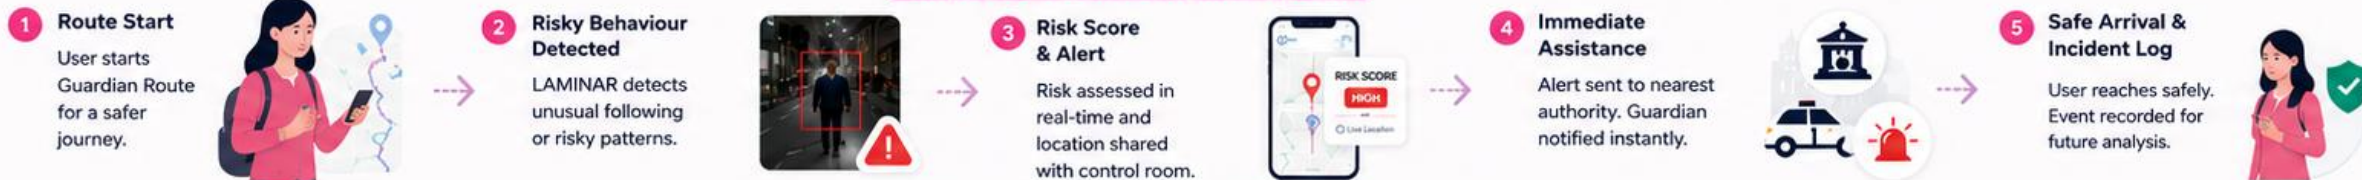

2. LAMINAR INTELLIGENCE ENGINE

3. REAL-WORLD ACTIONS

WOMEN SAFETY: GUARDIAN ROUTE IN ACTION

Enhanced Safety
Protect people, prevent incidents

Operational Efficiency
Reduce response time & operator workload

Cost Effective
Maximize value of existing infrastructure

Accountability & Evidence
Complete audit trail & incident reconstruction

Sustainable Cities
Smarter, responsive & resilient operations

LAMINAR turns real-time visual data into actionable intelligence for safer, smarter and more responsive environments.

LAND → EXPAND → BECOME INFRASTRUCTURE INTELLIGENCE

We start where cameras already exist.

Then we grow into the **intelligence layer** that runs the operation.

We don't sell more cameras.
We make existing infrastructure
10X more intelligent and valuable.

WHO PAYS?

Organizations with existing camera infrastructure

CAMPUSES & UNIVERSITIES

Student safety, crowd & incident intelligence

HOSPITALS & HEALTHCARE

Patient/visitor safety, emergency response

INDUSTRIAL & COMMERCIAL

Security, workforce safety, incident & asset protection

LARGE VENUES & STADIUMS

Crowd management, event safety

TRANSPORT HUBS

Traffic flow, crowd safety, emergency coordination

They already have cameras.
They need intelligence.

THE LAND → EXPAND ENGINE

1. LAND

Start Small.
Prove Value.

2. EXPAND

Add More Value.
Solve More Problems.

3. GROW

More Cameras.
More Capabilities.

4. SCALE

More Sites.
Bigger Impact.

5. BECOME

Infrastructure
Intelligence.

EXPANSION PATHS (EXAMPLES)

SAFETY & SECURITY

- Guardian Route
- Kinetic SOS
- Women Safety
- Intrusion & Loitering
- Incident Alerts

TRAFFIC & MOBILITY

- Traffic Intelligence
- AI Green Wave
- Congestion Detection
- Parking Intelligence
- ANPR & Violations

CROWD & EVENT INTEL

- Crowd Density
- Crowd Risk Prediction
- Unusual Behaviour
- Event Footfall
- Evacuation Support

OPERATIONS & ANALYTICS

- Video Search
- Incident Reconstruction
- Reports & Dashboards
- AI Assistant (Ask Laminar)
- Decision Support

INFRASTRUCTURE HEALTH

- Camera Health Monitor
- Network & Uptime
- Environmental Alerts
- Flood Monitoring
- Asset Monitoring

WHY CUSTOMERS EXPAND

Faster Detection
& Response

Safer People
& Assets

Better Decisions
with Data

Lower Operating
Costs

Higher Trust &
Accountability

HOW WE MAKE MONEY

01

PLATFORM SUBSCRIPTION (RECURRING)

Access to Laminar intelligence platform and core capabilities

02

DEPLOYMENT & INTEGRATION (INITIAL)

Setup, integration with existing infrastructure, training & onboarding

03

INTELLIGENCE MODULES (EXPANSION)

Advanced modules activated as customer needs grow

RECURRING REVENUE + EXPANSION REVENUE

Stronger over time. Scales with every camera, module and site.

OUR GO-TO-MARKET STRATEGY

Identify High Value
Use Case

Deploy & Prove
Impact Fast

Expand Modules
& Cameras

Expand to More
Sites

Enterprise / City
Scale

OUR FLYWHEEL

More Data

Better Intelligence

Proven Value

More Customers

More Scale

LAMINAR turns existing infrastructure into mission-critical intelligence.

Safer People

Efficient Operations

Lower Costs

Smarter Cities

TODAY, CAMERAS SEE. TOMORROW, INFRASTRUCTURE UNDERSTANDS.

From raw pixels to real-world impact — that's the future of intelligence.

SAFER
PEOPLE

SMARTER
OPERATIONS

STRONGER
COMMUNITIES

01

SEE

Visual reality captured
Cameras observe every moment across the city.

DATA

02

UNDERSTAND

Context brings meaning
LAMINAR interprets events, correlates across cameras and understands context.

INTELLIGENCE

03

PREDICT

Anticipate what's next
Predicts risks, congestion, crowd surges and incidents before they escalate.

FORESIGHT

04

COORDINATE

Right response, right time
Recommends actions, optimizes routes, triggers alerts and coordinates responders.

ACTIONABLE INSIGHT

05

SIMULATE

Test. Plan. Prepare.
Digital twins & scenario simulation help choose the best course of action.

PREPARATION

06

ACT

Real impact in the real world
Faster interventions. Reduced risk. Better outcomes for everyone.

REAL-WORLD IMPACT

CROWD SAFETY
Real-time density & risk monitoring

WOMEN SAFETY
Guardian Route & Kinetic SOS

TRAFFIC INTELLIGENCE
Flow, congestion & incident detection

AI GREEN WAVE
Priority for emergency vehicles

EMERGENCY RESPONSE
Faster alerts & optimized evacuation

INFRASTRUCTURE HEALTH
Camera health, uptime & asset monitoring

ENVIRONMENT INTELLIGENCE
Floods, fire, air quality & weather impact

OPERATOR AI ASSISTANT
Ask, search, act. Natural language intelligence

**THE JOURNEY
HAS JUST BEGUN.**

From one site to every city.
From data to decisions.
From *vision* to *impact*.

One Site

Prove Value
Solve Real Problems

Multiple Sites

Expand Modules
Increase Impact

Many Organizations

Standardize Intelligence
Across Operations

Smarter Cities

Connected. Intelligent.
Resilient.

Intelligent Infrastructure

Infrastructure that
Understands & Improves

LAMINAR is building the intelligence layer for the physical world — where every camera, every sensor and every system works together for a safer, smarter and better tomorrow.

OUR LIMITATIONS. OUR COMMITMENTS.

Honest today. Responsible tomorrow. Building trust into every layer of LAMINAR.

We don't hide limitations.
We **engineer** our way
beyond them.

⚠️ OUR LIMITATIONS

❓ WHAT IT MEANS

✅ HOW WE ADDRESS IT (TODAY)

🚀 OUR FUTURE COMMITMENT

01 DATA & INFRASTRUCTURE

We depend on existing cameras and network quality.

- Poor lighting, occlusion, low resolution
- Network latency or downtime affects detection and coverage

- Camera health monitoring
- Auto failover & reconnection
- Edge buffering & stream optimization

- Edge-native AI at every node
- Self-healing infrastructure mesh
- Multi-sensor fusion (IoT, radar, drones, satellites)

02 AI ACCURACY & TRUST

Models can make mistakes. No AI is perfect.

- False positives create noise
- False negatives can miss critical events

- Human-in-the-loop verification
- Confidence scoring & alert prioritization
- Continuous model retraining

- Self-learning models with active feedback
- Context-aware multimodal AI
- Explainable AI for every decision
- Stronger over time, not just bigger

03 DEPLOYMENT & INTEGRATION

Integrating with existing systems takes time.

- Different infrastructures, workflows and departments
- Slow down adoption

- Modular architecture & open APIs
- Works with existing VMS / systems
- Phased rollout: one workflow at a time

- Plug-and-play intelligence layer
- Standardized data & workflow connectors
- Marketplace for partners & extensions

04 PRIVACY, SECURITY & ETHICS

Handling sensitive visual data is a responsibility.

- Privacy misuse, data leaks or unauthorized access
- Can harm people and trust

- RBAC, permissions & access control
- Data minimization & audit logs
- Edge & federated AI where possible

- Privacy-preserving AI (federated, differential privacy, homomorphic tech)
- Zero-trust architecture
- Ethical AI governance board

05 VALIDATION & ROI

We need more real-world proof at scale.

- Accuracy, latency, cost savings and impact must be
- Proven in real environments

- Pilot deployments & controlled tests
- Measure: latency, accuracy, response time
- Iterate based on operator feedback

- Industry benchmarks & certifications
- Measurable ROI dashboards
- Evidence-driven scaling

06 ADOPTION & CHANGE

People and processes take time to change.

- Operators need training
- Processes need to evolve
- Trust needs to be earned

- Training & onboarding programs
- Simple, intuitive operator tools
- Continuous support & enablement

- AI assistant (Randy AI) for every role
- Intelligent automation that reduces workload, not replaces people
- Stronger together: humans + AI

THE ROAD AHEAD

From today's limitations to tomorrow's intelligence.

More Data
Real-world learning at every edge

Smarter Models
Adaptive, explainable, context-aware

Stronger Systems
Resilient, secure, self-healing

Greater Impact
Safer operations. Better decisions.

Intelligent Infrastructure
Infrastructure that understands, adapts and acts.

LAMINAR

Turning every limitation into a roadmap.
Building the intelligence layer for a safer, smarter and more resilient world.

Safer People

Efficient Operations

Lower Costs

Smarter Cities
